

## SIS 2000+ Training Manual

### Student Lockers

Using Locker Editor  
Using Student Lockers  
Using Locker Reports

#### ***Purpose***

The Locker Editor program defines school locker attributes such as Locker ID#, Lock ID#, locker type, locker location, maximum occupants, possible locker combinations, service status, etc. The Student Lockers application assigns the lockers to individual students.

#### ***Pre-Requisites***

The Locker Type Codes must have been set-up in the Table Editor.  
Students must be actively enrolled at a school site.  
Lockers must be defined in the Locker Editor before they can be assigned to students.

#### ***Training Objectives***

Add, edit, and delete locker information.  
Assign lockers to students.  
View locker information reports.

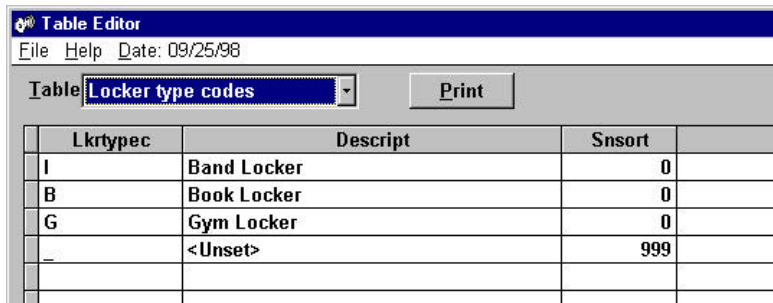

#### ***Accessing Locker Information***

From the SIS 2000+ Main Menu click **Enrollment**, then select the **Locker Editor** or **Student Lockers**.

## Pre-Requisite

### Locker Type Codes

Locker type descriptions and codes must be pre-defined in the Locker Type Codes table via the Table Editor. This may have been configured during SchoolNet installation however; if they are not yet defined you must do so now.

The screenshot shows a 'Table Editor' window with a menu bar (File, Help) and a date field (09/25/98). Below the menu is a 'Table' dropdown menu set to 'Locker type codes' and a 'Print' button. The table itself has four columns: 'Lkrtypec', 'Descript', 'Snsort', and an empty column. The data rows are as follows:

| Lkrtypec | Descript    | Snsort |  |
|----------|-------------|--------|--|
| I        | Band Locker | 0      |  |
| B        | Book Locker | 0      |  |
| G        | Gym Locker  | 0      |  |
| -        | <Unset>     | 999    |  |
|          |             |        |  |

**Lkrtypec** - an abbreviation describing the locker type.

**Descript** - the full description of the locker type.

**Snsort** – specifies the order in which the description appears in the field drop-down boxes.

### Locker Editor

From the Enrollment Menu, click on the Locker Editor button. Use the List or VCR buttons to scroll through the locker records.

**Type** - Designate the type of locker, such as book locker, gym locker, instrument locker, etc. The available choices are pre-defined in the Locker Type Codes table.

**Locker ID** - Enter the identification number of the locker (the number that is physically displayed on or next to the locker).

**Location** - Select the campus location where the locker is located. Available choices are pre-defined in the School Editor application via the **Campus Locations** command button.

**Level** - Enter a number to designate a category for the locker. A "level" could indicate upper, middle, or lower rows, for example, or it could indicate degrees of location, reserved status, grade level designations, etc.

**Max Occupants** - Enter the maximum number of occupants that can be assigned to share this locker. The number entered here will restrict assignments of this locker in the Student Locker application.

**Out of Service** - Put a check mark in this box if the locker is out of service for any reason.

**Lock ID** - Some lockers use separate, external locks. Enter the ID number (serial number) of the external lock, if applicable.

**Currently Assigned Students** - A read-only list displaying the students who have been assigned to this locker via the Student Locker application. This field is not applicable when adding a new locker.

**Combination 1-5** - There may be more than one possible locker combination provided by the locker manufacturer or the external lock manufacturer. These combinations are commonly switched from year to year by mechanical means. Enter up to five combinations available and put a check mark in the combination that is currently in use.

## ***Tasks***

### ***Add a Locker***

To add a locker, click the Add button. Use the Tab key to move from field to field to enter information. Save the record.

### ***Edit/Delete Locker Records***

Click Edit to change locker information. Once the necessary changes have been made, Save the record.

To delete a locker record, click the delete button. Answer "Yes" to confirm the deletion process.

#### ***Note:***

If you try to delete a locker record that has students assigned to it, you will receive a message explaining that you must first remove the assigned students from the locker before you can delete.

If the above note appears, you must go into the Student Lockers application and

## ***Locker Listing Report***

This report provides a list of student lockers, including student names, locker ID#, locker type, combinations, maximum occupancy, etc. The information can be sorted accordingly. The report can also be saved to file.

## Locker Listing Report

## Student Lockers

The Student Lockers application creates student locker assignments. The interface allows the assignment of more than one locker per student and more than one student per locker.

The list is displayed alphabetically by Type. To change the sort order, click Sort on the Title bar and make your selection.

Print Find List Delete Edit Add Save Quit

## Assigning Lockers

To assign lockers, click **Add**. A list of all available lockers will be displayed in a read-only list that is alphabetically sorted by type. Click Sort on the title bar to change the sorting order. Lockers that are already fully occupied (according to the Maximum Occupants constraint) will not be shown.

### Filter the Locker List

You may wish to filter the list of available lockers according to specific locker groups. To do so, click the Location box, select the location and designate the Level to which the locker belongs. (i.e. on campus, second level)

**Location** – Select the campus location where the lockers are located.

**Type** – Designate the type of locker to search for, such as book locker, gym locker, etc.

**Level** – Enter a number to designate a category of lockers to search for. A level could indicate upper, middle, or lower rows, for example, or it could indicate degrees of location, reserved status, grade level, etc.

**Max Occupants** – Enter the maximum occupancy status of lockers to search for (number of students allowed to share a locker).

Click the **Refresh List** button to apply the current filter. The list will display only those lockers that satisfy all filter criteria.

### Check Current Occupants

Some lockers may already have students assigned to them but are still available for more occupants to share. To check the existing occupants, click on the entry line, then click **Occupants**. If there are no current occupants the button will be disabled.

### Assign Lockers

From the retrieved list, select the target locker to assign to the current student and click on the **Assign** button. Repeat this action to assign other lockers from the list, if necessary.

Click Done to return to the main screen. The current student's record will now show the updated locker assignments.

### Delete Lockers

Select the locker to delete, then click the **Delete** button. A dialog box will appear. Answer "Yes" to confirm the deletion or "No" to abort.

### **Generate Locker Assignments Report**

The **Student Locker Assignments Report** is based on a list of student names as primary entries. Under each student name is a sub-list of all lockers assigned to that student. Included in the default report is basic student demographic information, such as Student ID#, gender, birth

date, and age. Options allow the inclusion of student ethnicity codes, student's home phones, locker combinations, and the names of locker partners (students who share the same locker). The Student Assignments Report can be saved to file.
